Anthony Saah

Full Stack Web Developer
+233 53 415 5475 | anthonysaah589@gmail.com | anthonysaah.me | github.com/thepapisogram

Education

Ghana Communication Technology University — Tesano, Accra
Bachelor of Science in Computer Science — *Dec. 2022 – Present*

Awards & Achievements

1st Place Winner | GDG-ACITY Hackathon 1.0 — October 2025
- Acted as **Lead Frontend Engineer** for the winning team, delivering a production-ready interface within a 24-hour development cycle.

1st Place Winner | ATF (African Technology Forum) AI Challenge — 2025
- Headed frontend development for an AI-integrated application, prioritizing data-rich visualizations and user-centric design.

Experience

Frontend Developer — Jan. 2025 – Mar. 2025
SkyCrew Technologies — *Remote*
- Developed responsive UIs for critical dashboards, including login, signup, and main user portals using React.
- Optimized React components for performance, resulting in a more seamless and low-latency user experience.
- Architected intuitive user authentication flows to simplify the onboarding process for new users.

Frontend Developer / Tutor — June 2023 – Oct. 2023
Sumundi Inc. — *Ghana*
- Conducted technical tutoring sessions while hosting interactive on-air programs to bridge the gap between tech and community engagement.
- Managed show segments and conducted interviews, communicating complex technical concepts to a broad audience.
- Engaged listeners through informative and entertaining content, focusing on user-centered technology trends.

Full Stack Developer — Jan. 2023 – Present
Freelance / Open Source — *Remote*
- Architecting and deploying end-to-end web solutions using the T3 Stack (Next.js, TypeScript, Prisma, Tailwind CSS).
- Building custom, scalable content management systems (CMS) and integrating secure payment infrastructure via Paystack.

Projects

GOSA Global | *Next.js, Tailwind CSS, PostgreSQL, Vercel* — 2025 – 2026
- Developed a comprehensive alumni platform (gosaglobal.org) with a custom-built CMS.
- Implemented dynamic routing, secure authentication, and a global member database.

Jotter | *Next.js, Node.js, Vercel* — Feb. 2026
- Designed and developed a minimalist, markdown-supported notes application with custom branding and UI components.

Nirvana Event Platform | *Next.js, MongoDB, Paystack* — Nov. 2024 – Jan. 2025
- Built a full-scale ticketing platform for a major concert series with real-time SMS notifications via TXTConnect.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, PHP, SQL (Postgres), HTML/CSS, Dart
Frameworks: Next.js, React, Node.js, Laravel, Express
Libraries: Tailwind CSS, Shadcn UI, DaisyUI, Socket.io
Developer Tools: Git, VS Code, Postman, Vercel, Netlify, Cloudinary
